SUMMARY

Full-stack developer with hands-on experience building and deploying MERN-stack applications, REST APIs, and cloud-hosted services. Skilled in optimizing database performance, implementing secure role-based authentication, and shipping production-ready features end-to-end. Strong foundation in data structures, system design, and Agile development, with 400+ problems solved across competitive coding platforms.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

2023 – 2027

RGM CET, Nandyal, Andhra Pradesh | Expected Graduation: April 2027 | CGPA: 8.1 / 10 | No Backlogs

Intermediate (MPC)

2021 – 2023

Narayana Junior College, Kadapa, Andhra Pradesh | 96.8%

TECHNICAL SKILLS

Languages	: JavaScript (ES6+), TypeScript, Python, Java, SQL, HTML5, CSS3
Frameworks & Libraries	: React.js, Next.js 14, Node.js, Express.js, Tailwind CSS, Redux/Zustand (Basic)
Databases & Cloud	: MongoDB (Aggregation Pipeline), PostgreSQL, Redis (Basic), AWS (EC2, S3) (Basic), Docker
Developer Tools	: Git, GitHub, Postman, Linux/Bash, GitHub Actions CI/CD
Core CS	: DSA, OOP, System Design, Agile/Scrum (Basic), Debugging (Basic), Security Systems (Basic)

EXPERIENCE

Full Stack Developer Intern — Eduskills Academy

Feb 2026 – Jul 2026

Node.js, Express.js, Next.js 14, MongoDB, Python FastAPI, JWT, AWS, Docker

- Designed and implemented project components end-to-end across frontend and backend, working on database schema, API endpoints, and deployment.
- Built 6+ REST APIs (Node.js, Express) with middleware validation and JWT-based role-based access control.
- Optimized MongoDB aggregation pipelines and Redis caching, cutting latency by approximately 40%.
- Deployed Dockerized services to AWS EC2 and built the Next.js 14 frontend, achieving sub-2s Largest Contentful Paint (LCP).

Frontend Developer Intern — Smart Bridge

May 2025 – Jul 2025

HTML5, CSS3, JavaScript, React.js, Tailwind CSS

- Built responsive web pages using React.js and Tailwind CSS as part of the MERN Stack internship program, focused on UI optimization and performance improvement.

PROJECTS

NutriCloud — Secure E-Commerce & Behavioral Monitoring Platform [GitHub ↗](#) | [Live ↗](#)

Next.js 14, Node.js, Express, MongoDB, Python (FastAPI), Redis, JWT, AWS, Recharts, Tailwind CSS

- Built a dual-layer MERN platform on AWS combining an e-commerce storefront with a backend security-monitoring layer, using MongoDB aggregation pipelines for bot and anomaly detection.
- Implemented a dynamic risk-scoring engine cached in Redis, with JWT-based role-based access control backed by a Python FastAPI microservice.
- Built a Recharts-powered admin dashboard for real-time risk-score visualization and clickstream analytics.

DocSpot — Doctor Appointment Booking Platform [GitHub ↗](#) | [Live ↗](#)

React (Vite), Node.js, Express, MongoDB (Atlas), JWT, Socket.io, Tailwind CSS, Framer Motion

- Built a full-stack healthcare appointment booking platform with role-based dashboards for patients, doctors, and admins.
- Implemented secure authentication (JWT, bcrypt, Google OAuth) and a real-time appointment status workflow using Socket.io.
- Designed doctor onboarding and verification flows and admin moderation tools, with Multer file uploads and Zod-validated forms.

CERTIFICATIONS & ACHIEVEMENTS

- AWS Academy Graduate – Cloud Foundations, AWS Training and Certification (Jul 2024) [↗](#)
- MongoDB Associate Developer, MongoDB (Dec 2025) [↗](#)
- GfG 160 – 160 Days of Problem Solving, GeeksforGeeks [↗](#)
- GfG Full Stack Developer Bootcamp, GeeksforGeeks [↗](#)
- 1st Rank, College Kaggle Competition (2026); 2nd Rank, College Coding & Web Development Events (2024–25)
- 400+ coding problems solved across [LeetCode ↗](#), [CodeChef ↗](#), [HackerRank ↗](#) & [GeeksforGeeks ↗](#) (LeetCode Contest Rating 1352, Top 93%)
